

**RHINO RESOURCE CENTER
NEWSLETTER – AUGUST 2006 - #4**

Dear colleagues,

This is the fourth quarterly e-newsletter of the Rhino Resource Center to alert you of recent books and articles about the rhinoceros. If you want to add others to this service, or unsubscribe, send me an email (rhino@rookmaaker.freeserve.co.uk)

In the past quarter I have added 235 new references, which brings the total number of items in the database to 10,951.

Below I have listed new entries published since 2000. The older ones will appear on www.rhinoresourcecenter.com once the database is updated.

I thank the following people for contributions of papers and advice by Raj Amin, Maan Barua, Marcus Clauss, EAZA office, Adam Felts, Reinaud Fulconis, Friederike von Houwald, John Gripper, Gijs van der Ham, Jane Kennedy, Simon Keynes, Terry Roth, Joanna Skipwith, Annelize Steyn, and Nico van Strien.

Remember that anything not listed here might be a welcome addition to the RRC database.

The range of subjects is wide, as is the variety of papers. There must be something for everybody, so have a look and browse through all the titles.

Thank you,

Dr Kees Rookmaaker
Chief Editor of the Rhino Resource Center
