
WORKSHOPS AND REPORTS

MALAYSIA RHINO PHVA WORKSHOP

A population and habitat viability assessment workshop for Malaysia rhino will be conducted in Sandakan, Sabah on 27 and 28 November 1995.

- Assemble as many as possible of persons who have information or involvement in rhino conservation and management in Malaysia.
 - Review existing information on numbers, distribution, and threats to Sumatran rhino in Malaysia.
 - Simulate probable fates of Malaysian rhino populations under various scenarios of action and non-action.
-
- Revise Malaysian Action Plan for Rhino Conservation, including formulation of quantitative and measurable objectives.
 - Assess progress on GEF Project; adjust the Malaysian GEF Project Work Plan for the next year.
 - Develop Recommendations for further action, especially:
 - Specific requests to Malaysia Government(s) (Federal and State) to increase support.
 - Drafts of proposals for other projects and donors.
 - Provide training for Malaysian wildlife biologists in application of PHVA techniques to conservation problems.
