

**RHINO RESOURCE CENTER  
NEWSLETTER #9  
NOVEMBER 2007**

Dear colleagues,

This is the ninth quarterly e-newsletter of the Rhino Resource Center to alert you of recent books and articles about the rhinoceros.

In the past quarter I have added 429 new references, which brings the total number of items in the database to 11.429. Below I have listed new entries published since 2000. These, as well the older items, can be found on the RRC website.

**[www.rhinoresourcecenter.com](http://www.rhinoresourcecenter.com)**

Many items are also found in PDF format on the website. In this respect, I am pleased to announce that the SADC Regional Programme for Rhino Conservation and the IUCN/SSC African Rhino Specialist Group have chosen the RRC to disseminate their public reports to a wide public. Many reports will soon be added.

The RRC website also has well over 1100 images of rhinos in all kinds of environments. Many zoo keepers have helped to add pictures of rhinos in zoological gardens around the world to the site. It is our aim to have a picture of every rhinoceros ever kept in captivity with appropriate documentation, to build a “virtual studbook”.

<http://www.rhinoresourcecenter.com/> receives about 180 visitors every day! It is worthwhile browsing the site or to add to the messageboard. Please subscribe to this if you have not yet done so.

The next Rhino May Day will be held in London on 14 May 2008 organised by RRC – ZSL – SRI.

Thank you,

Dr Kees Rookmaaker  
Chief Editor of the Rhino Resource Center  
[www.rhinoresourcecenter.com](http://www.rhinoresourcecenter.com)

c/o IUCN Species Survival Programme, 219c Huntingdon Road, Cambridge CB3 0DL, United Kingdom
