

**ROYAL MENAGERIE,
EXETER 'CHANGE STRAND.**

Revived and IMPROVED by S. POLITO.

THE first Emporium of LIVING CURIOSITIES in the known world is now classically divided into three different Apartments, in a most substantial, clean, and beautiful order.

First Apartment—Admittance 1s. each.

A most majestic Male LION.

Just arrived, the TAPIR, or Hippopotamus of the New World.

A Pair of BENGAL ROYAL TYGERS, which, for size and beauty, were never excelled, if ever equalled, in this kingdom—A LAUGHING HYÆNA, from the Cape of Good Hope, perfectly tame—The STRIPED HYÆNA, from Abyssinia.—The PANTHER, from South America—a distinct variety of extraordinary fine LEOPARDS, from different parts of the world—Lately arrived, and considered a great rarity in this country, THE REAL JAGUAR—A Beautiful TYGER CAT, from Amboyna—A pair of those most singular Animals, lately discovered in the interior of India, called the URSINE SLOTHS, male and female, particularly described in Dr. Shaw's Zoology—The Great Egyptian CAMEL, the only one in England, with an extensive and pleasing variety of the Simsi Tribe, and other curious and interesting Animals.

Second Apartment—Admittance 1s. each.

The most scientific Male Elephant, the only one in England that is adorned with fine large ivory tusks, the same that performed forty nights at the Theatre-Royal, Covent-Garden, and now exhibited in his natural purity, in which he appears so far superior, as hardly to be known for the same animal.

The stupendous RHINOCEROS, or Real Unicorn, is the most formidable of all terrestrial animals, and the only large quadruped that is armed with a single horn (Unicorn). He is covered with a coat of mail or armour, capable of resisting the force of a musket-ball. His size is immense, and the prodigious manner in which he has grown since his arrival in July 1810, is hardly credible, but so perfectly gentle that even a child may approach him with great safety.

Third Apartment—Admittance 1s. each, or the three 2s 6d.

Just arrived in the Essex East Indiaman, and the only animal of that description in this kingdom, A beautiful Male NYLGHAU—a singular animal lately from Peru, of the genus *Camelus*, the LAMA. The CASSOWARY from the Island of Java—two large EMEWS, or Linnæus' Southern Ostriches, from Van Dieman's Land—the CASSOWARY of New South Wales—the Cyrus, or great Crane of Bengal—two pairs of KANGAROOS, of a distinct breed—several Balearic or Royal Crown CRANES, from the Coast of Guinea—a pair of CURASOES, from the Bay of Honduras—the Silver VULTURE, from the Brazils—the great Female ELK from North America—with a vast variety of other rare Birds of the most splendid plumage.

And the enormous Skeleton of a SPERMACEI WHALE, 65 feet long, and the only one in England.

* * * The utmost value given for all kinds of Foreign Birds and Beasts.

PETIT-OR MANUFACTORY,

420, Strand, nearly opposite the Adelphi.

A GRAND AND USEFUL DISCOVERY.

A. MESURE, Chronometer and Watch-maker, in consequence of the great scarcity of bullion, and the exorbitant price of Gold, has been induced to produce, by long labour and study, a substitute, which he has denominated PETIT-OR; this important discovery has been sanctioned by the most flattering marks of public approbation.

The Petit-Or approximates so nearly to Gold, and possesses so much of its quality, that the difference can scarcely be observed by the most curious inspector.

It has an unrivalled richness of colour; is susceptible of an incomparable lustre of polish, and not being so ductile as Gold in some respects, is not so easily spoiled of its beauty by scratches; yet in others it yields to the force of the hammer, and may be moulded into any form. As it will tarnish sooner than Gold, it requires that care which Gold does not, but every time it is cleaned it will recover its original lustre and colour.

It is particularly adapted for Watch-cases, Snuff-boxes, and all sorts of Jewellery, for which Gold is at present employed.

A MESURE, sole inventor and proprietor of Petit-Or, respectfully informs the public, that he has removed his Manufactory from Craven Buildings, to 420, Strand, opposite the Adelphi, where he has on sale a large assortment of Watches of all descriptions, with cases made of his incomparable Petit-Or; he pledges himself that if any Watches with his name, sold by him, should not be found to perform well, they shall be rectified free of expence during the course of a whole year, provided the fault may not proceed from any unfair usage or accident; also Gold and Silver Chronometers for sea and pocket; capp'd, jewelled, horizontal, duplex, going fuzee and plain Watches, all warranted as above; likewise all sorts of Gold Jewellery.

The following articles of Petit Or are ready for sale, viz. Snuff-boxes, Tooth-pick and Pencil Cases, Spectacles, Opera and Eye Glasses, Watch-chains, Seals, Bracelets, Neck chains, Thimbles, Combs, and a variety of Ladies' Ornaments, &c. Of Plate, Table, Dessert, Tea and Egg-spoons, Tea and Cream Pots, Sugar-tongs, and snuffers; the Egg-spoons do not lose their colour in the Eggs as Silver does, nor has the acid of Fruit any effect on the Dessert-knives. For Gentlemen in the Army, Swords for Cavalry, Infantry, and Grenadiers, Dirks, Daggers, Gorgets, Belt plates, Spurs, &c. All sorts of Watch-cases neatly made at a fixed price.

The above articles are strenuously recommended to Captains of Ships, and Gentlemen going to the East and West Indies, as great advantage may be derived from them, as also the wrought metal, which may be moulded to the fashion of the place. The Petit-Or can be had no where but at the Inventor and Proprietor's manufactory, where orders will be received, for any sort of Plate, Jewellery, and Fancy Articles, and due attention paid to them. The wrought metal sold in ingots, at £2 10s. per lb. troy weight, or 4s 6d. the oz. flattened.

Prepared Rouge to clean the above articles, sold in small quantities, and wholesale for exportation, for ready money only.

N B. As the Proprietor (A. MESURE) does not employ any Agent or Traveller in the sale of his Petit-Or, all orders, addressed to him, at his Manufactory, 420, Strand, will be punctually attended to, and the Genuine Article will be certainly procured. [2206]
