

*Notice is hereby given to the Curious among
the Nobility and Gentry,*

THAT there is just arriv'd from Bengall in
the East-Indies, alive and in good Health, that strange
and wonderful Creature, call'd

A RHINOCEROS.

This Beast, when full grown, is next in Bigness to an
Elephant; it has only one Horn, which grows out of the
Snout, and is, when at its full Bigness, so strong and
tharp that with this in fighting it kills the Elephants.
No Creature of this Kind has been seen in England, or in
any other Part of Europe, these 54 Years, and then only
one.

It is to be seen, at Half a Crown each Person, in Eagle-
Street, near Red-Lyon Square, from Nine in the Morning
till Eight at Night.
