MONTHLY REPORT

DECEMBER 2002

BY

Dr. AIDI MOHAMAD

&

STEVE ROMO

INTRODUCTION

Two breeding occurred when Ara bred Rima and Seputeh this month. The other three females showed no positive behaviour although they were mixed with the male on regular basis. Seputeh was bred on Dec. 4 and Rima was on Dec. 17 respectively.

Blood sample were collected as usual, twice weekly and the samples were sent to UPM for hormonal analysis. Blood was also sent to Veterinary Research Institute, Ipoh for routine checking.

As for Minah, she was weighed weekly and her weight improved a lot after giving her the 'Equine Senior' pellet. Her weight has been up and she looked more active and alert. The other rhinos are also in a good health and they were weighed once a month.

RHINO MANAGEMENT

A) Daily Management

i) Night stall

Daily work

Starting this month, Mohd Noor will manage the night stalls together with Shariff and Umor. Shariff and Umor will clean the night stalls daily while Mohd. Noor inspected the food supply when it arrived around 9.30 a.m. The browse and fruits were weighed and cleaned before giving to the rhinos. About 40 to 50 kg of browses and 7kg of fruits including papaya, banana and sweet potatoes were given daily. The rhinos were also given horse pellet about 2.0kg every morning. Every Monday and Thursday morning, blood samples will be collected from all rhinos.

The rhinos

The rhinos were let out first before cleaning the night stalls. After cleaning, the browses were put in the feed trough and the rhinos were let in for their morning meal. The drinking water was changed daily and stress vet (multi-mineral powder) was mixed inside it. Daily observation was made and recorded in the workbook for each rhino. The rhinos were fed twice daily: 9.00 a.m. and 3.00 p.m.

ii) Ten acres enclosure

Daily Work

Adam will inspect the electric fencing every morning. The fencing will be cleaned from any foreign objects such as spider web, dried leaves or creepers to avoid short circuit. Voltmeter was used to ensure that the voltage of the fencing is about 7.0 kV. They will also inspect the fencing for any damages.

During the inspection, the ranger will look for the rhino inside the enclosure and called the rhino for their morning meal. The rhino was confined in the quarter acre first before putting their browse in the feeding trough. The amount given was about 100kg for each rhino per day.

B) Breeding Program

i) Breeding Introduction

a) Rima

Starting from Dec 14, Rima was mixed with Ara. No breeding behaviour observed until Dec 16. Ara followed Rima but she looked in her early stage of estrus. On Dec 17, Rima was scanned and her follicle is about 19 to 20mm. She was then mixed with Ara and showed some breeding behaviour. The rhinos were mixed again in the afternoon and Ara bred Rima for 7 and 15 minutes respectively.

b) Seputeh

Ara bred Seputeh on Dec 4 after mixing them starting from Dec. 2. Some interest observed on Dec. 3 but the breeding took place the next day for 52 minutes.

c) Panjang

Panjang was mixed on daily basis to stimulate to cycle. No positive behaviour observed and her P4 level is low between 0.09ng/ml to 0.21ng/ml throughout the month.

d) Mas Merah

Mas Merah progesterone profile is irregular. Her hormone level fluctuated between 0.46ng/ml to 0.81ng/ml. She was mixed with Ara daily but she blowing and vocalizing during the mixing.

e) Minah

Minah was also mixed on regular basis but no breeding occurred. Her progesterone level is also low between 0.01ng/ml to 0.09ng/ml.

ii) Bleeding Program

a) Blood Collection

The blood collection was carried out twice weekly, every Monday and Thursday. The bleeding procedure was summarized in Table 1.

b) Progesterone Hormone Profile

Blood samples were sent to UPM for hormonal analysis and the latest blood result was attached below.

C) HEALTH STATUS

Minah showed an improvement and her weight is being monitored on weekly basis. The result is tabulated in Table 4. The other rhinos were weighed once a month.

Table 3: Rhinos' Body Weight (Kg), December 2002

Month/ Rhino ID	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec
RIMA	552	542	542	554	580	576	562		558	580	606	*
MAS MERAH	612	590	578	586	595	594	584		602	600	630	632

Table 4: Minah's Weekly Body Weight (Kg), December 2002

Rhino ID / Date	4/12	13/12	18/12	24/12	2/1
Minah	495	490	498	495	496

Table 1: Blood Collection from the Rhinos, December 2002

Date	Rhino ID	Area taken	Remarks
Dec 2	Mas Merah Rima Minah Panjang Seputeh	Tail Tail Tail Tail Tail	Samples were taken from two females for P4 analysis.
Dec 4	Panjang Minah Mas Merah	Tail Tail Tail	Samples were taken from the females for P4 analysis.
Dec 10	Rima Minah Mas Merah Panjang Seputeh	Tail Tail Tail Tail Tail	Blood was taken for P4 analysis
Dec 13	Minah Panjang Mas Merah Rima	Tail Tail Tail Tail	Samples were taken from all rhinos for P4 analysis.
Dec 17	Mas Merah Minah Seputeh Panjang	Tail Tail Tail Tail	Samples were taken from the females for P4 analysis.
Dec 19	Minah Panjang Mas Merah Rima Seputeh	Tail Tail Tail Tail Tail	Samples were taken from the females for P4 analysis.
Dec 30	Minah Seputeh Rima Panjang Mas Merah	Tail Tail Tail Tail Tail	Blood was taken for the P4 analysis

Table 2: Observation on the Rhinos During Introduction, December 2002

Date	Rhino ID	Observation
Dec 2	Seputeh & Ara	Seputeh wanted to fight with Ara. Head butting was observed throughout the period.
	Minah & Ara	No interest observed.
Dec 3	Minah & Ara	No interest observed between the two rhinos.
	Seputeh & Ara	Some interest observed. Mounting and head butting when mixed in the afternoon.
	Panjang & Ara	No interest observed.
Dec 4	Seputeh & Ara	Ara bred Seputeh for 52 minutes.
Dec 14	Rima & Ara	No interest observed between the two rhinos.
Dec 15	Rima & Ara	No interest observed between the two rhinos.
Dec 16	Rima & Ara	Positive behaviour observed but Rima looked early.
Dec 17	Rima & Ara	Some breeding behaviour observed in the morning. Ara bred for 7 and 15 minutes respectively in the afternoon.
Dec 19	Minah & Ara	No interest observed.
	Mas Merah & Ara	Mas started to blow when approaching the feeding area.
Dec 20	Minah & Ara	Ara sniffed Minah but no further response.
	Mas Merah & Ara	Mas vocalized and blowing when saw Ara
	Panjang & Ara	No interest observed
Dec 30	Seputeh & Ara	No interest observed.
Dec 31	Minah & Ara	No interest.
	Mas Merah & Ara	Vocalized a lot and wanted to fight
	Panjang & Ara	No interest.
	Seputeh & Ara	Head butting and some aggression

Sumatran Rhinoceros Hematology Summary; Sungai Dusun, December 2002

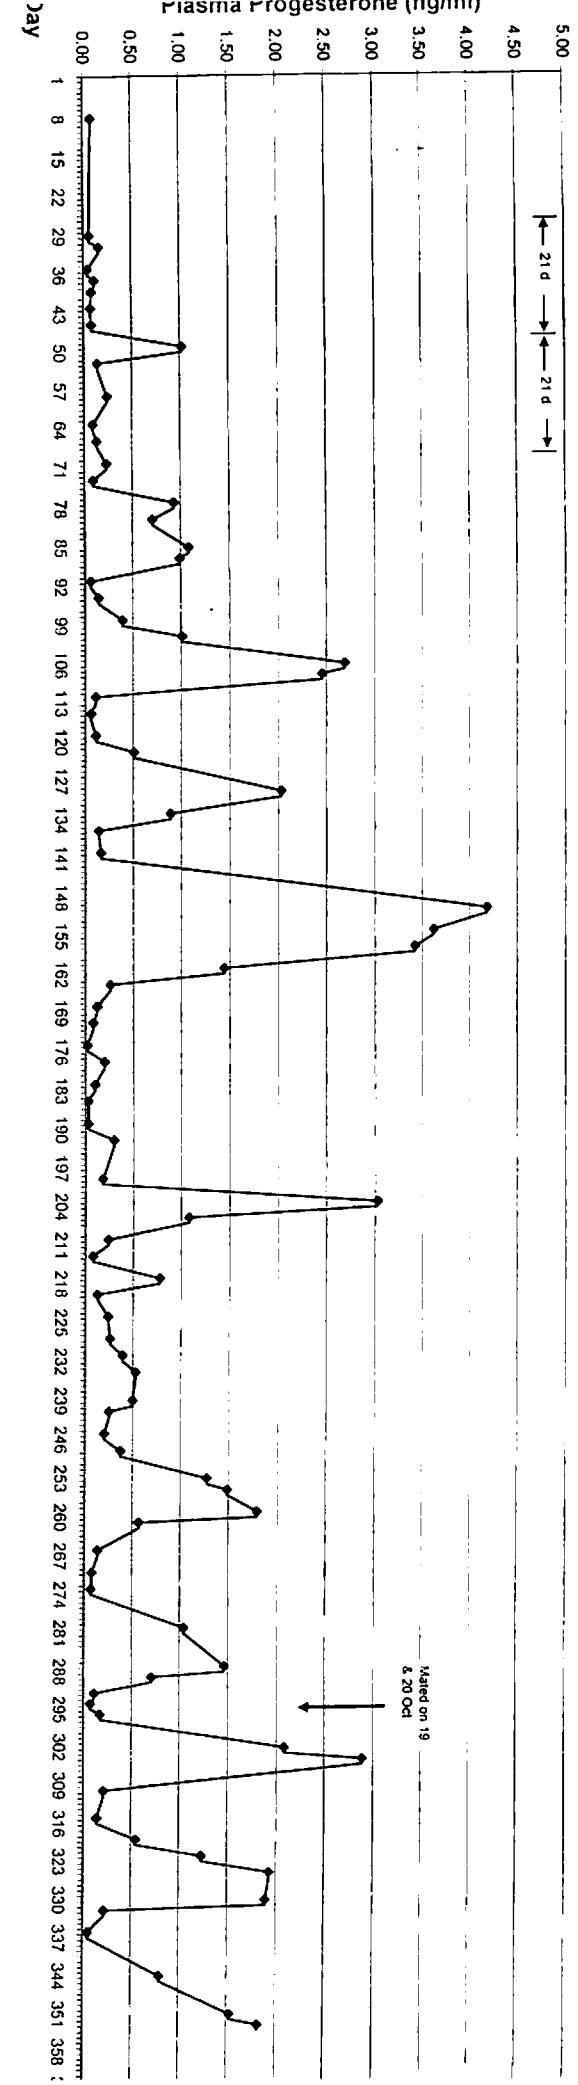

Hematology Parameter	Unit	MINAH	RIMA	ARA	MAS MERAH	SEPUTIH	PANJANG
