

Body Condition Scoring of captive white rhinoceros *Ceratotherium simum*

Thijs van den Houten

Introduction

- Looking after a very large/heavy female rhino
- Body Condition Scoring
Domestic hoofstock → rhinos
- Research goals
 - To develop a BCS system and
 - To compare the BCS of the white rhinos within Europe

Methods

- Sent out request for pictures in September 2010
- Scoring systems available
 - Observable criteria for assessing the physical condition of the white rhinoceros in the field, M.E. Keep, 1971
 - Rhino body condition assessment module, AfRSG
- Looking at neck, ribs, spine, pelvic bones and rump with the following scores:
 - 1= very poor
 - 2= poor
 - 3= fair
 - 4= good
 - 5= obese

Questions

Conclusion

- The BCS system developed seems to work.
- When comparing all the individual BCSs most rhinos are within BCS 3 or 4.

BCS	1	2	3	4	5
N	0	1	15	30	19

Future

Repeat research next year to keep monitoring the BCS of captive white rhino

Project now includes over 80 rhinos within Europe
