

**Fromaget, J.; Saurin, E., 1936.** Note preliminaire sur les formations cenozoiques et plus recentes de la chaine annamitique septentrionale du Haut Laos (stratigraphie, prehistoire, anthropologie). Bulletin du Service Geologique d'Indochine 22 (3): 1-48, figs. 1-54, table 1

In the neolithicum the mammals are the same as present, with a relative abundance of rhinoceros represented by two species, *R. Javanicus* and *R. sumatrensis*, which are now quite rare in Indochina.
