

£1, to be had at the usual places and at the Room.

LEICESTER FAIR.

ROYAL NATIONAL MENAGERIE.

MR. GEORGE WOMBWELL, (Proprietor) begs most respectfully to announce to the nobility, gentry and inhabitants of Leicester and its vicinity to take this opportunity of offering his magnificent establishment for their inspection, assuring them, that there never has been seen either in a travelling or in any zoological Establishment in Europe, so rare and valuable a collection of Animated Nature as his Amphitheatre Menagerie now affords, and trusts, on this occasion, to receive a share of their support and patronage.

On the morning of the 6th of October, the noble Lioness gave birth to four remarkably fine Cubs. The Dam attends to them with the greatest solicitude and care.

Also on the 2nd of September last, in Smithfield, London, the Royal Bengal Tigress, produced two beautiful Cubs; they with the mother are in perfect health.

Since Mr. W's. last visit he has made several rare and valuable additions, amongst others, that beautiful group of Lions, Tigers, Leopards, &c., which lately excited so much interest, by their wonderful performance at the London Theatres.

This superb collection contains Three Elephants, the largest and smallest ever seen in the British Empire, noble Groups of Lions, the finest pair of Royal Bengal Tigers ever imported to Europe. The great Polar, or Arctic Sea Monster, or the White Bear from the Frozen Regions, the (largest ever brought to England). A variety of Hyenas Striped and Spotted, the Female has lately brought forth a young one, which is considered by Naturalists a great curiosity, as it was thought they never would breed in this country, a pair of those singular productions of nature, the Black Tigers of South America, Chittah or Hunting Tigers, Male and Female Gnu or the Horned Horses of South Africa, Ashantee and Senegal Leopards. The Ocelot or Tiger Cat, Civet Fossil, Musk and Gennet Cats. A herd of Kangaroos. The Alphahos from Peru, Zebras, the Mustula Guba or Honey Bear, Jackalls, Racoons, Ant-Eaters &c, &c.

The great Mandrills or Variegated Baboons, together with the finest collections of Monkeys, Birds, and Serpents ever seen.

In order to render his menagerie superior to any other, Mr. Wombwell, has, after several years labour, procured one of those singular Animals, the Male Rhinoceros, or Unicorn of Scripture, the largest ever imported to this part of the Globe, and cannot fail to afford gratification to Naturalists or Amateurs in the Works of Nature.

The Menagerie will be open from Nine o'Clock in the morning till ten at night,

For further particulars see hand-bills.
