SCIENTIFIC FOREST MANAGEMENT FOR TIMBER EXTRACTION

Nepal imports over 80% of its timber despite being rich in forests. Efforts are being made to reduce the import and increase local timber production through scientific forest management program. This allows the timber to be extracted without hampering the environment.

ELECTRIC WIRE FENCING TO STOP ELEPHANT TERROR

Solar electric fences have been constructed to prevent threat from elephants in Baduwal neighborhood, Dodhara Chandani Municipality, Kanchanpur, Far West Nepal. The action was taken after destruction of crops and vegetation was reported. It was implemented in hopes to minimize the loss and damages.

DRAINING THE IMJA LAKE

Nepal Army drained one meter of water from the Imja Lake in Solukhumbu, Eastern Nepal, under Community Based Flood and Glacial Lake Outburst Risk Reduction Project operated by the Department of Hydrology and Meteorology. Locals are also lending a helping hand. This program was funded by United Nations Development Program (UNDP) and Global Environment Facility.

DoE TO SET UP THREE AIR MONITORING STATIONS

The Department of Environment (DoE) is set to install three air monitoring stations in the valley with financial and technical assistance from ICIMOD (International Centre for Integrated Mountain Development). This project will observe black carbon content within the valley along with cancer-inducing pollutants, PM 2.5, PM 10 and Total Suspended particles (TSPs).

SNOW LEOPARD COLLARED

A female leopard has been collared with GPS in Kanchenjunga Conservation Area in Eastern Nepal for the first time. This program hopes to understand its migration, critical habitat and keep track of the endangered species. The program was conducted by the Department of National Parks and Wildlife conservation along with other organizations.

ANIMALS ARE NOT TO BE HUNTED INSIDE FORESTS

The killing of nilgais (*Boselaphus tragocamelus*) and wild boars have continued despite the animals being forced back into their natural habitat. The Uttarakhand state declared these animals to be vermins, which allowed local residents to kill them freely. However, animal rights activists are in an uproar that such killings have not been limited to city areas, as was originally intended.

INVASIVE SPECIES INCREASE IN HIMACHAL

The natural ecology of many forests of Himachal Pradesh (HP) is under threat as invasive species are growing in number. Nearly three lakh hectares of forests in HP, now contain species like lantana, ageratum, etc. which could multiply in number and establish themselves as dominant species in less than 10 years.

DRAFT NATIONAL FOREST POLICY PUBLISHED

To solve the major problem of Animal- Human conflict, the Environment Ministry has published a draft national forest policy. This policy will replace the National Forest Policy of 1988 and will mitigate the ongoing conflict with a better wildlife management system that will address the urgent needs to safeguard both parties.
