*Mr. Cherry Kearton's latest film, "Dassan," starting on Monday next, deals, in sound and dialogue, with the intimate life of the penguins on Penguin Island. The birds in their "talkie" tell where they go, and other pictures of animal life are introduced into the story*

### THE RARE WHITE RHINOCEROS

*Formerly abundant half a century ago, there are but few survivors of this species in South and South-East Africa to-day*
