

## RHINOCEROS HORN

SIR,—I have recently read the very interesting letter to the *Field* by Mr. Sholto D. Vickers on the curative value of rhino horn.

Although I was not aware that the horn has any curative properties, I do know, however, that high prices are paid by Indians and Chinese (35/- per lb.), who use it in some form or another as an aphrodisiac.

Yours truly,

MWINDAJI.
