

begin at Eight.

To be SEEN over EXETER 'CHANGE, and at the
LYCEUM in the Strand,

THE best COLLECTION of LIVING
CURIOSITIES in Europe. The late Additions over
the 'Change are two singular Varieties of Rams brought a
Thousand Miles to ornament this Collection, and which very
much please the Public; the Lion is supposed to be near ma-
turity, and all agree that a handsomer was ever produced.
The Collection of Birds has never been equalled in this
Country. At the Lyceum is that most wonderful of the Ani-
mal Tribe which has attracted the attention of all Ages; the
Rhinoceros, which from his impenetrable Coat of Mail, and
great Strength, sets the whole Creation at defiance, and, as a
treat to the School Boys, is shewn with him, without any
addition of Expence, the most beautiful Zebra ever seen.

DANCING.
