
This is to acquaint the Publick,

THAT the YOUNG RHINOCEROS, who has been seen with the highest Satisfaction by most of the greatest Personages in *Europe*, as well as the greater Part of the Royal Society, will be at the King's Arms, Smithy-Door *Manchester* this Week.

Of all the extraordinary natural Curiosities ever exhibited in common, nothing ever drew the Attention of the real curious Part of Mankind so much as this surprising Creature: She is cloathed in real Coat of Armour, and weighs upwards of eight hundred Weight.

The Price to see this Curiosity is one Shilling.
