### Record Indian Rhinoceros.

To the Editor of "The Standard."

Sir,—In reference to account of a rhinoceros lately shot in Assam, of which the height is given as 6ft. 4in. at shoulder, and which is stated "to be probably the biggest specimen of the Indian rhinoceros ever shot." I find, on referring to some old shooting notes, that a party of which I formed one killed a rhinoceros in Bengal, in April, 1871, that measured 6ft. 5in. at the shoulder. An account appeared in the "Oriental Sporting Magazine" of July, 1871.

I am, Sir, your obedient servant,

L. J. W.

Rodland, Bristol.
