

THIS is to give Notice, that there will be shewn at the Royal Oak in Dover, during the Fair, A Female RHINOCEROS: or, The Real UNICORN. A Work of Nature hardly to be parallel'd; the Beast that destroys the Elephant. This extraordinary Animal is Five Years old, she is five Foot and a half high, eighteen Foot and two Inches round the Body, and fourteen Foot two Inches from the Nose to the Rump, yet has upwards of fifteen Years longer to grow. She is grown upwards of twenty Hundred Weight bigger than she was two Years since, also very surprizing in her Foldings, being more and much larger than at that Time. She has travell'd a Thousand Leagues by Land thro' the Great Mogul's Dominions to Bengal; from whence it was brought over on board the Shaftsbury, Capt. Bookey.

She is upwards of Forty Hundred Weight, has a large Horn on her Nose, Three Hoofs on each Foot, and a Hide thick stuck with Scales, Pittol Proof, and so surprizingly folded as not to hinder its Motion, and to defend it from the Injuries of all other Animals; with many other Particulars which the Curious may observe; and is the only compleat Animal of that kind, that has been seen in England these 85 Years, according to the best Information that has been receiv'd.

N. B. The said Rhinoceros will be shewn at Sandwich Fair, and afterwards at Canterbury.

From the London Evening Post, Nov. 17.

As soon as his Majesty passed through the City, all the Streets in the principal Streets were illuminated, as were all
