AUGUST 2006

COMMUNIQUE

ASSOCIATION OF ZOOS & AQUARIUMS

Zoos Go Wild...page 4

ON THE COVER

Through strict protection and conservation measures, the Indian rhino has recovered from a low of 40 to 50 animals in 1900 to over 2,100 animals today. However, there is little room for complacency with 40 percent of Indian rhinos in Nepal having been killed by poachers in the last five years.

The Indian rhino on the cover was photographed at the Royal Chitwan National Park in Nepal.
