You and the Zoo

but also for critical conservation efforts worldwide. She spent the past 26 years at the San Diego Zoo Safari Park enjoying weekly pedicures from her keeper family, afternoon back scratches alongside the watering hole, and buckets of her favorite treats—red apples! Most importantly she was doted on day and night by her family of animal care experts and was worlds away from the poachers that have decimated her species.

Nola epitomizes our vision to lead the fight against extinction. Her sweet nature touched countless visitors and sparked a passion for wildlife in millions of children around the world. Her team of keepers and veterinarians provided world-class care during her time at the Safari Park, and San Diego Zoo Global is leading collaborative efforts to save Nola's species.

With Nola's passing last November, only 3 northern white rhinos remain on Earth. Just as Dr. Harry's dream continues today, Nola has left a legacy that will carry us into the future.

You can become part of this story and help transform our efforts to end extinction as we Roar Forward into the next 100 years!

Join our pride and help us Roar Forward!
