INTRODUCTION

This studbook contains records for living animals through 6 December 2019. Information has been recorded and entered into the studbook as it was provided. Please send any questions about or errors in the data to the studbook keeper at the address and phone number listed below.

I would like to acknowledge the institutions that have provided data for this studbook, the Rhinoceros Taxon Advisory Group, particularly Adam Eyres and Lisa Smith, Disney's Animal Kingdom® for supporting me in this role, and Joe Christman for previously maintaining this database. Finally, to all of the institutions contributing to rhinoceros conservation, thank you for your support, there is a long road ahead and every bit helps!

Best wishes,

Gina M. Ferrie, PhD

AZA Regional Studbook Keeper for Eastern Black Rhinoceros (*Diceros bicornis michaeli*)

CONSERVATION STATUS

Eastern black rhinoceros are found in Eastern African in Kenya and Tanzania, with an introduced population also growing in South Africa. They are currently listed as Critically Endangered by IUCN, with an approximate population of 740 in Africa, making it the rarest of the three remaining black rhino subspecies (Emslie 2011). The biggest threat to the species continues to be poaching for their horn.

Data Conventions

Studbook ID – unique number assigned to each individual in the studbook. The studbook number is a permanent number.

Birth Date – This field indicates the date of an animal’s birth. There is a birth date for every individual. Please check the next column “Birth Date Est.” to judge the accuracy of that date.

Birth Date Est. – Indicated if the Birth Date field is an estimate.

None = No estimation

Day = The day is estimated

Month = The month is estimated

Year = The actual birth date is within the year of the Birth Date field

Sire/Dam –

Numbers indicate the Studbook ID of the parents of the zoo born animals

WILD indicates that an animal was wild caught and its parents are unknown wild individuals

UNK indicates that the animal was zoo-born but identification of the parents is not known

MULT indicates that there are several possible parents in zoos, but the specific one could not be determined. A parental assumptions note in the Specimen Notes field is included with this parental designation to indicate which animals could be the potential parent.

Sex – male, female, unknown

Event – This field documents the movements of individual animals from the first location to the current or last known location. This includes Birth/Hatch, Transfer, Death, Go LTF (Lost to Follow up), Return from LTF, and Release. UNKNOWN indicates that the animal exists or existed, but its location cannot be reliably confirmed.

Location – This field indicates the location where the event took place.

Local ID – This is the number assigned by the institution in which the event took place. UNKNOWN indicates that either an ID was not assigned or no information exists to indicate that an ID was assigned.

Date – This field documents the date that events occurred. Each event has a date associated with it. Also, check the adjacent column (Date Est.) to determine the accuracy of this date.

Date Est. – Indicates if the adjacent Date field is an estimate.

None = No estimation

Day = The day is estimated

Month = The month is estimated

Year = The actual date is within the year of the Event Date field

House Name – This field indicates the name given to the animal at a specific location. Individuals may be given a different house name each time they move to a different location.

Prior to converting to ZIMS, the rearing convention was to assume parent reared unless otherwise noted in an institution record. After conversion to ZIMS, rearing will be updated to the determination made in an institution's record. However, wild caught rhinos will still be assumed to be parent reared unless the acquisition information provides additional information to change that assumption.

All individuals recorded as a transaction history that begins in Africa (or E. Africa) are assumed to have WILD/WILD parents unless otherwise documented.
