

GEOLOGICAL OBSERVATIONS

ON THE

VOLCANIC ISLANDS,

VISITED DURING THE VOYAGE OF H. M. S. BEAGLE,

TOGETHER WITH

SOME BRIEF NOTICES ON THE GEOLOGY OF AUSTRALIA AND
THE CAPE OF GOOD HOPE.

BEING THE SECOND PART OF
THE GEOLOGY OF THE VOYAGE OF THE BEAGLE,
UNDER THE COMMAND OF CAPT. FITZROY, R.N.
DURING THE YEARS 1832 TO 1836.

BY

CHARLES DARWIN, M.A., F.R.S.,

VICE-PRESIDENT OF THE GEOLOGICAL SOCIETY, AND NATURALIST TO THE EXPEDITION.

Published with the Approbal of the Lords Commissioners of
Her Majesty's Treasury.

LONDON:
SMITH, ELDER AND CO., 65, CORNHILL.

1844.

Scientific Works Illustrated.

UNDER THE AUSPICES OF H. M. GOVERNMENT, AND OF THE HON. THE COURT OF DIRECTORS OF THE EAST INDIA COMPANY.

FAUNA ANTIQUA SIVALENSIS,

THE FOSSIL ZOOLOGY OF THE SEWALIK HILLS, in the North of India. By HUGH FALCONER, M.D., F.R.S., F.L.S., F.G.S., Member of the Asiatic Society of Bengal, and of the Royal Asiatic Society of the Bengal Medical Service, and late Superintendent of the H. E. I. C. Botanic Garden at Saharunpoor: and PROBY T. CAUTLEY, F.G.S., Major in the Bengal Artillery, Member of the Asiatic Society of Bengal, &c. Edited by HUGH FALCONER.

Plan of Publication.—The work will appear in about Twelve Parts, to be published at intervals of four months; each Part containing from Twelve to Fifteen folio Plates. The descriptive Letterpress will be printed in royal octavo. Price of each Part, one Guinea.—Part I. contains PROBOSCIDEA.—Parts II. and III., containing the continuation of PROBOSCIDEA, will be published shortly. Prospectuses of the Work may be obtained of the Publishers.

"A work of immense labour and research. . . . Nothing has ever appeared in lithography in this country at all comparable to these plates; and as regards the representations of minute osseous texture, by Mr. Forl, they are perhaps the most perfect that have yet been produced in any country. . . . The work has commenced with the Elephant group, in which the authors say 'is most signally displayed the numerical richness of forms which characterises the Fossil Fauna of India;' and the first chapter relates to the Proboscidea—Elephant and Mastodon. The authors have not restricted themselves to a description of the Sewalik Fossil forms, but they propose to trace the affinities, and institute an arrangement of all the well-determined species in the family. They give a brief historical sketch of the leading opinions which have been entertained by palaeontologists respecting the relations of the Mastodon and Elephant to each other, and of the successive steps in the discovery of new forms which have led to the modifications of these opinions. They state that the results to which they themselves have been conducted, lead them to differ on certain points from the opinions most commonly entertained at the present day, respecting the fossil species of Elephant and Mastodon."—*Address of the President of the Geological Society of London, 20th Feb. 1846.*

RESEARCHES, PHYSIOLOGICAL AND ANATOMICAL.

By JOHN DAVY, M.D., F.R.SS., L. & E., &c. The principal subjects treated of are—Animal Electricity—Animal Heat—the Temperature of different Animals—Pneumothorax in connexion with the Absorption of Gases by Serous and Mucous Membranes—the properties of the Blood in Health and disease—the Properties of different Animal Textures—the Putrefactive Process—the Preservation of Anatomical Preparations—the Effects of the Poison of certain Serpents—the Structure of the Heart of Batrachian Animals, &c. &c. In 2 vols. 8vo., price 30s. bound in cloth, illustrated by numerous Engravings.

"The subjects treated by the author are extremely numerous and interesting; several new facts in the physiology of animals are brought forward, and some curious and instructive experiments are explained and illustrated with remarkable felicity."—*Monthly Chronicle.*

"This work is written with a clearness and simplicity which renders its scientific details readily comprehensible."—*Herald.*
